"Presentations That Dazzle"

It's important to present like a professional. Attendees' quick judgments are based on how the instructors are perceived - beginning with their first contact as well as through the presentation of the material content. If your trainers are not good speakers, or they design lackluster programs, then they are giving the participants a false perception of their expertise. During this course, attendees will be exposed to a mixture of training and development applications as well as professional speaking techniques which will help ensure programs are as dynamic and effective as possible. After all... it's about the attendees and how well they are able to learn what is taught. And that is ultimately how the company and its trainer's performance are judged.

Session Objectives - Upon the completion of the course, the participant will be able to:

- List the fundamental elements that comprise the development and delivery of a successful and effective presentation.
- Design an educational session utilizing a universally acceptable outline format.
- Determine the essential aspects of including content that is relevant and necessary for the anticipated audience.
- Utilize various techniques for energizing an audience as well as generating active involvement of the participants.
- Offer a presentation style that is up-to-date regarding technique and technology.
- Tell a story that engages and energizes an audience.
